

## Este posibilă comunicarea? – reflecții pe marginea trilemei lui Gorgias din Leontinoi

*„Gorgias stabilea succesiv trei capete pentru demonstrație: <primul că nu este nimic, al doilea că dacă ar fi ceva , nu ar fi comprehensibil și, în sfârșit, al treilea, chiar dacă ar fi cuprins, n-ar putea fi nici enunțat, nici explicat altuia>” (Sextus Empiricus, Adv. Math. VII, 65, apud Vlăduțescu: 1998, p. 223).*

**Title:** Is it possible to communicate ? Reflections on Gorgias of Leontinoi trilemma's

**Abstract:** The Sophist were from the beginning some controversial philosophers. Some of the listeners believed that these were wise people and highly educated, and others believed that they were some charlatans only interested to collect the taxes. The first question that comes to our mind when we talk about the language coding is: "From where the thoughts come to us?". Which is the algorithm designating a thought to occur more quickly than another, and why a thought appear faster rather than another? We "choose" the thoughts, or these choose us? How free we are when we decide to follow a thought? Many theologians, astrologers and philosophers have tried to answer to these questions.

**Keywords:** Gorgias of Leontinoi, It is possible to communicate ? The greek sophist, Gorgias trilemma's, The thoughts,
